

MAKE USE OF IT!

MATH QUESTION GENERATOR

Key features

Customizable difficulty

- Customize digits
- Operations
- Number of questions!

Accessible, limitless questions, good feedback

Now what?

Implementing this program enables the development of an innovative learning approach– mitigating exam–related stress and fostering daily progress towards overcoming careless calculations!

What?

It is a simple math question generator that provides you calculations that requires you to solve!

Calculations that you need to solve, including: addition, subtraction, division, multiplication, or maybe a mixed operation!

So what?

Have you experienced a horde of simple, yet a barrage of calculations that you need to do? Careless mistakes are prone to it! With this you could prepare for tasks that does not permit calculators especially in exams! In addition you could even utilize this to keep your brain active!

It is said that careless math mistakes include miscalculations– specifically mistakes in basic arithmetic operations (Think Academy, 2023).

"It isn't the mountain ahead that wears you out; it's the grain of sand in your shoe."

—Robert W. Service
